8. INSTALLATION

1. The valves can be mounted in any position without affecting operation
2. Pipe connection identifier is: G = G (ISO 228/1) or compression fitting
3. For compression fitting types tightness is achieved by the compressed gasket on the blow tube
4. The use of the rubber gaskets as sealing members will allow a slight misalignment in piping when using compression fittings
5. Other pipe threads are available on request
6. Installation/maintenance instructions are included with each valve
7. Spare Parts Kit and replacement coils are available
